

GENTAS TABLE TOP CARE/MAINTENANCE INSTRUCTIONS

Furnlink recommends using warm soapy water and a non-abrasive cloth to clean your Gentas Table Tops. Do not use harsh or potent substances. Regular cleaning of your Gentas Table Tops will help to ensure its longevity and durability. We recommend that you get into a routine of cleaning and caring for your Gentas Table Tops on a regular basis.

To prevent general wear and tear such as surface scratches, it is very important to inspect the underneath of your tableware on a regular basis for sharp or abrasive edges. Sharp and abrasive edges should not be exposed to Gentas Table Top surfaces. Do not under any circumstances stack tables with Gentas Table Tops attached on top of each other or another surface. There is a very high risk of damaging or scratching the surface. Furnlink does not recommend exposing Gentas Table Tops to direct sunlight for long periods of time, the table top will convex when heated but will flatten out after cooling down.

Furnlink (the national importer/distributor for Werzalit by Gentas Table Tops) under no circumstances will discount, replace or have the Table Tops returned due to the lack of care/maintenance or general wear and tear.

GENTAS TABLE TOP SURFACE CREASE/IMPERFECTION STATEMENT

All Werzalit by Gentas Table Tops have a number of small creases/imperfections in the surface finish. These creases/imperfections are mostly seen on corners (square table tops) and round surfaces (round table tops). Please refer to images below.

These creases/imperfections are not a fault. Werzalit by Gentas (the manufacture) advised that it is impossible to produce a molded top without surface imperfections and that these creases/imperfections will not have any effect to the Table Top structure or long lasting durability. After production, the creases/imperfections are white in colour, Werzalit by Gentas disguise them by painting them.

Furnlink (the national importer/distributor for Werzalit by Gentas Table Tops) under no circumstances will discount, replace or have the Table Tops returned due to these creases/imperfections. The creases/imperfections do not effect to the Table Top structure and will not void Furnlink's 2 year commercial structural warranty.
